

2x2 DiD: Enforcement Gap Before and After Ebarimt

DiD = -1.562 | Pre-gap = 1.44 -> Post-gap = -0.12

Error bars = 95% CI. DiD = (B2C post - B2C pre) - (B2B post - B2B pre).
Negative DiD means B2C bunching fell more than B2B -> Ebarimt effective.
