

Raw Revenue Distributions Around the Active VAT Threshold

Average annual number of firms per 1M MNT bin (0–1M catch-all bin excluded)

B2B (Control) B2C (Treatment)

Each panel shows the mean annual firm count per 1M revenue bin, pooled within each policy era.
Red dashed line = VAT registration threshold (10M pre-2016; 50M from 2016).
Visible spike just below the threshold indicates bunching (tax-minimising behaviour).
