

# VAT's Share of Mongolian Tax Revenue, 2005–2024

Domestic + import VAT, net of refunds, as a percentage of total tax revenue

Source: NSO General Government Budget revenue and GDP (current prices); NSO CPI for the deflator. Vertical line = January 2016 reform. The pre-reform threshold (10M MNT, fixed 2001–2015) lost real value to inflation, drawing more small firms into VAT before the 2016 increase.
